TATTINGSTONE NEIGHBOURHOOD PLAN 2024 - 2037

Strategic Environmental Assessment & Habitat Regulation Assessment Screening Determination Notices (April 2024)

Overview

This report, which is divided into two parts, relates to the Regulation 14 Pre-submission draft version of the Tattingstone Neighbourhood Plan 2024 - 2037' which was published for consultation in January 2024, and is hereafter referred to as the 'Tattingstone NP'. A copy of this was made available for screening purposes at the same time. The purpose of this report is to determine whether a Strategic Environmental Assessment (SEA) and/or an Appropriate Assessment in relation to Habitat Regulation Assessment (HRA) matters are required.

Part A addresses SEA. Part B addresses HRA.

The report also refers to:

- the SEA and the HRA Screening Reports that have been prepared on behalf of the district council by Land Use Consultants, which can be found online at:

<https://www.babergh.gov.uk/documents/d/babergh/tattingstone-np-sea-screening-report-mar24>

<https://www.babergh.gov.uk/documents/d/babergh/tattingstone-np-hra-screening-report-mar24>

- and to the screening consultation responses to these from the statutory bodies reproduced in Appendix 1.

The Tattingstone NP contains the following vision, which feeds into five area wide objectives:

Tattingstone Parish will remain an attractive and desirable place to live, maintaining its historic and environmental assets. It will be a thriving and sustainable community, with the three parts of the Parish retaining their own identities and characteristics but supporting each other through the provision of appropriate services and facilities.

The vision and objectives then translate into thirteen policies (TATT 1 to TATT 13). The Plan does not allocate any sites for new housing or other built development but policy TATT 1 states that the Neighbourhood Area will accommodate development commensurate with the policies of the adopted Babergh & Mid Suffolk Joint Local Plan (Part 1) and that new development will be focussed within the defined Settlement Boundaries, where the principal of development is accepted. The policy specifies that proposals for development outside of that area will only be permitted where they are in accordance with national, district and neighbourhood level policies and where they would not have a detrimental impact. Policy TATT 3 addresses proposals for affordable housing on rural exception sites, specifying that such proposals will only be permitted where there is proven need in the parish and where specific criteria are met. The remaining policies address a range of topics including landscape and views, local green spaces, design, non-designated heritage assets, flooding, and parking standards.

Part A - Strategic Environmental Assessment Determination

1. Introduction

One of the basic conditions that all neighbourhood plans will be tested against by the independent examiner is whether the making of that Plan is compatible with European Union obligations, as incorporated into UK law. Whether a neighbourhood plan requires a SEA and the level of detail needed will depend on what is proposed in the draft Neighbourhood Plan and the characteristics of the local area.

2. Legislative Background

European Union Directive 2001/42/EC (the SEA Directive), transposed into UK law through the SEA Regulations, requires a Strategic Environmental Assessment to be undertaken for certain types of plans or programmes that would have a significant environmental effect. The Environmental Assessment of Plans & Programmes Regulations 2004 (the Regulations) require that this is determined by a screening process, which should use a specified set of criteria (set out in Schedule 1 of the Regulations). The results of this process must be set out in a SEA Screening Statement, which must be publicly available.

In accordance with Regulation 9 of the SEA Regulations 2004, Tattingsstone Parish Council (the qualifying body) asked Babergh District Council (BDC) (the responsible authority) to determine whether an environmental report on their pre-submission draft neighbourhood plan was required due to significant environmental effects. In making this determination, BDC have had regard to Schedule 1 of the Regulations.

In line with the advice contained within the National Planning Policy Framework (NPPF) and Planning Practice Guidance, the Plan's potential scope has been assessed against the criteria set out in Schedule 1 of the 2004 Environmental Assessment Regulations. As mentioned already, Land Use Consultants (LUC) were commissioned to prepare a screening report to assess whether SEA would be required.

SEA can be required in some limited situations where a sustainability appraisal is not needed. Neighbourhood Planning is one of these situations. Sustainability Appraisals (SAs) may incorporate the requirements of the Strategic Environmental Assessment Regulations, which implement the requirements of the 'Strategic Environmental Assessment Directive' on the assessment of the effects of certain plans and programmes on the environment.

A Sustainability Appraisal ensures that potential environmental effects are given full consideration alongside social and economic issues, and it is good practice to do one to understand how a plan is to deliver sustainable development. However, NPPF Planning Practice Guidance states that there is no legal requirement for a neighbourhood plan to undertake a Sustainability Appraisal as set out in Section 19 of the Planning and Compulsory Purchase Act 2004. It is down to the qualifying body to demonstrate whether the plan is likely to have significant environmental effects. This is the purpose of the SEA Screening Report.

3. Criteria for determining likely significance of effects

The criteria are set out in the following table:

1. The characteristics of plans and programmes, having regard, in particular, to:
 - a) the degree to which the plan or programme sets a framework for projects and other activities, either with regard to the location, nature, size and operating conditions or by allocating resources,
 - b) the degree to which the plan or programme influences other plans and programmes including those in a hierarchy
 - c) (the relevance of the plan or programme for the integration of environmental considerations in particular with a view to promoting sustainable development,
 - d) environmental problems relevant to the plan or programme,
 - e) the relevance of the plan or programme for the implementation of Community legislation on the environment (e.g. plans and programmes linked to waste-management or water protection).

2. Characteristics of the effects and of the area likely to be affected, having regard, in particular, to:
 - a) the probability, duration, frequency and reversibility of the effects,
 - b) the cumulative nature of the effects,
 - c) the trans-boundary nature of the effects,
 - d) the risks to human health or the environment (e.g. due to accidents),
 - e) the magnitude and spatial extent of the effects (geographical area and size of the population likely to be affected),
 - f) the value and vulnerability of the area likely to be affected due to:
 - i) special natural characteristics or cultural heritage,
 - ii) exceeded environmental quality standards or limit values,
 - iii) intensive land-use,
 - g) the effects on areas or landscapes which have a recognised national, Community or international protection status.

[Source: Schedule 1 of Environmental Assessment of Plans & Programmes Regulations 2004]

4. Assessment

The neighbourhood plan vision, and a summary of its policies are set out in the Overview. A full assessment of the likely effects of the Plan are set out in the relevant screening report.

5. SEA Screening Conclusion

The LUC Screening Report concludes that the Tattingstone NP “...does not directly impact on land use through the allocation of sites for housing or other forms of development” and that, on this basis, “the Plan is unlikely to have significant environmental effects and that full SEA is therefore not required.”

Consultation on the SEA Screening Report was carried out with the Environment Agency (EA), Historic England (HE), and Natural England (NE). Written responses were received from all three bodies and these are replicated in Appendix 1.

- The EA response does not comment specifically on the SEA report
- HE have concluded that, on the basis of the information supplied, and in the context of the criteria set out in Schedule 1 of the Environmental Assessment Regulations [Annex II of ‘SEA’ Directive], that the preparation of a Strategic Environmental Assessment is not required.

- NE have concluded that, on the basis of the material supplied with the consultation, that significant effects on statutorily designated nature conservation sites or landscapes are unlikely.

6. SEA Determination

In the light of the SEA Screening Report (March 2024) prepared by LUC and having considered the responses to this from the three statutory consultees, it is our determination that the Tattingstone Neighbourhood Plan 2024 - 2037 **does not require** a Strategic Environmental Assessment in accordance with the Environmental Assessment of Plans and Programmes Regulations 2004.

Part B – Habitats Regulations Determination

1. Introduction

It is a requirement of European Law that a plan or project is subject to an assessment to determine whether it is likely to have a significant effect on the integrity of any 'European Site', in terms of impacting on the site's conservation objectives.

Submitted neighbourhood plans need to be accompanied by a statement to explain how the proposed Plan meets the 'basic conditions' set out in Schedule 4B of the 1990 Town and Country Planning Act. These include a requirement to demonstrate how the Plan is compatible with EU obligations, which includes the need to undertake a Habitats Regulations Assessment (HRA). This is one of the matters that will be tested at the independent examination.

The assessment itself and the level of detail needed will depend on what is proposed in the draft Neighbourhood Plan and the potential impacts on Habitats Sites designated for their nature conservation interest.

This report therefore determines whether a HRA under the UK Conservation of Habitats and Species Regulations 2017, which enacts the Habitats Directive¹, is required for the Tattingstone NP.

2. Legislative Background

One of the basic conditions that neighbourhood plans must meet is that:

"The making of the neighbourhood development plan does not breach the requirements of Chapter 8 of Part 6 of the Conservation of Habitats and Species Regulations 2017"

The Conservation of Habitats and Species Regulations 2017 include regulations on the assessment of plans (including neighbourhood plans) and projects on a Habitats Site (European Site or a European offshore marine site). The first stage is to screen the plan to see whether it is likely to have a significant effect on any Habitats sites. If the plan is 'screened-in' because likely significant effects cannot be ruled out, the next stage is for an Appropriate Assessment to be carried out considering the impact on the Habitats site's conservation objectives. Consent for the Plan can only be given if it is 'screened-out' at the first stage, or the Appropriate Assessment concludes the integrity of the Habitats site will not be adversely affected.

Case law is also relevant, including most notably the 'People over Wind' and 'Holohan' rulings. The 'People Over Wind, Peter Sweetman v Collie Teoranta' judgement ruled that it is not permissible to take account of measures intended to reduce or avoid any harmful effects of a plan or project on a European Site at the screening stage. Any mitigation measures can now only be considered at the appropriate assessment stage. The 'Holohan and Others v An Bord Pleanála' judgement also imposes more detailed requirements on the competent authority for any plans or projects at the Appropriate Assessment stage, including, but not limited to cataloguing the entirety of habitat types and species for which a site is protected and being beyond reasonable scientific doubt concerning the effects of the work envisaged on the site concerned.

¹ Directive 92/43/EEC 'on the conservation of natural habitats and of wild fauna and flora': <http://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:31992L0043>.

3. Assessment

In determining whether a proposed development plan or programme is likely to have significant effects, the local authority must incorporate the 'precautionary principle' into its decision. This means that if there is uncertainty as to whether the plan or programme would cause significant effects on a Habitats Site, the full Appropriate Assessment would be required.

The neighbourhood plan vision, and a summary of its policies are set out in the Overview. A full assessment of the likely effects of the Plan are set out in the relevant screening report. The screening has also been prepared in accordance with the relevant CJEU judgements.

The following European sites were identified as lying within 20km of the neighbourhood plan area:

- Stour and Orwell Estuaries Special Protection Area (SPA) and Ramsar site
- Hamford Water Special Area of Conservation (SAC), SPA and Ramsar site
- Deben Estuary SPA and Ramsar site
- Essex Estuaries SAC
- Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar site
- Sandlings SPA

4. HRA Screening Conclusion

The Screening Report concludes that:

'... no likely significant effects are predicted on European sites as a result of the Tattingstone Neighbourhood Plan, either alone or in combination with other policies and proposals..'

and that:

"An Appropriate Assessment is therefore not required."

Consultation on the HRA Screening Report was carried out with the Environment Agency (EA) and Natural England (NE). Their responses are set out in Appendix 1.

- The EA response does not comment specifically on the HRA report
- NE have concluded, on the basis of the material supplied with the consultation, that significant effects on Habitats sites, either alone or in combination, are unlikely.

5. HRA Determination

In light of the HRA Screening Report (March 2024) prepared by LUC and having considered the responses to this from the statutory consultees, it is our determination that the Tattingstone Neighbourhood Plan is '**screened out**' from further assessment under the Habitats Regulations 2017 and that an Appropriate Assessment is not required.

Dear Sir/Madam

REGULATION 14 TATTINGSTONE NEIGHBOURHOOD PLAN

Thank you for consulting us on the Draft Neighbourhood Plan for Tattingsstone.

We regret that at present, we are unable to review this consultation. We have had to prioritise our limited resource, and must focus on influencing plans where the environmental risks and opportunities are highest.

For the purposes of neighbourhood planning, we have assessed those authorities who have “up to date” local plans (plans adopted within the previous 5 years) as being of lower risk, and those authorities who have older plans (adopted more than 5 years ago) as being at greater risk. We aim to reduce flood risk and protect and enhance the water environment, and with consideration to the key environmental constraints within our remit, we have then tailored our approach to reviewing each neighbourhood plan accordingly.

We note the Babergh and Mid Suffolk Local Plan was recently adopted in 2023, and that there are not any important environmental constraints, within our matrix for currently screening neighbourhood plans, that affect this Neighbourhood Plan Area. At this time, therefore, we are unable to make any detailed input on neighbourhood plans being prepared within this local planning authority area.

We encourage you to seek ways in which your neighbourhood plan can improve the local environment. For your information, together with Natural England, Historic England and Forestry Commission, we have published joint guidance on neighbourhood planning, which sets out sources of environmental information and ideas on incorporating the environment into plans. This is available at: [How to consider the environment in Neighbourhood plans - Locality Neighbourhood Planning](#).

The Local Authority will be able to advise if there are areas at risk from surface water flood risk (including groundwater and sewerage flood risk) in your neighbourhood plan area. The Surface Water Management Plan will contain recommendations and actions about how such sites can help reduce the risk of flooding. This may be useful when developing policies or guidance for particular sites and sustainable drainage measures can complement other objectives such as enhancing green spaces.

We trust that this advice is useful.

Yours sincerely

Miss Lucy Fielder | Sustainable Places - Planning Advisor

By e-mail dated 11 April 2024

Re: Tattingstone NP SEA Screening Consultation request

Historic England

Dear Paul,

Thank you for inviting Historic England to comment on this consultation. As the Government's adviser on the historic environment Historic England is keen to ensure that the protection of the historic environment is fully taken into account at all stages and levels of the local planning process. Therefore we welcome this opportunity to review the Screening Report for this plan. For the purposes of this consultation, Historic England will confine its advice to the question, "Is it (the Tattingstone Neighbourhood Plan) likely to have a significant effect on the historic environment?". Our comments are based on the information supplied with the Screening Opinion.

The Screening Report indicates that the Council considers that the plan will not have any significant effects on the historic environment. We note that the plan does not propose to allocate any sites for development.

On the basis of the information supplied, and in the context of the criteria set out in Schedule 1 of the Environmental Assessment Regulations [Annex II of 'SEA' Directive], Historic England concurs with the Council that the preparation of a Strategic Environmental Assessment is not required.

The views of the other two statutory consultation bodies should be taken into account before the overall decision on the need for an SEA is made.

I should be pleased if you can send a copy of the determination as required by REG 11 of the Environmental Assessment of Plans and Programmes Regulations 2004.

We should like to stress that this opinion is based on the information provided by you with your correspondence. To avoid any doubt, this does not reflect our obligation to provide further advice on later stages of the SEA process and, potentially, object to specific proposals which may subsequently arise (either as a result of this consultation or in later versions of the plan) where we consider that, despite the SEA, these would have an adverse effect upon the environment.

Historic England strongly advises that the conservation and archaeological staff of the relevant local authorities are closely involved throughout the preparation of the plan and its assessment. They are best placed to advise on; local historic environment issues and priorities, including access to data held in the Historic Environment Record (HER), how the allocation, policy or proposal can be tailored to minimise potential adverse impacts on the historic environment; the nature and design of any required mitigation measures; and opportunities for securing wider benefits for the future conservation and management of heritage assets.

Please do contact me, either via email or the number below, if you have any queries.

Ross McGivern (he/him)

Dear Mr Bryant

Thank you for your consultation on the above dated and received by Natural England on 12 March 2024.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

Screening Request: Strategic Environmental Assessment (SEA) and Habitats Regulations Assessment (HRA)

It is Natural England's advice, on the basis of the material supplied with the consultation, that:

- **significant effects on statutorily designated nature conservation sites or landscapes are unlikely; and,**
- **significant effects on Habitats sites¹, either alone or in combination, are unlikely.**

The proposed neighbourhood plan is unlikely to significantly affect any Site of Special Scientific Interest (SSSI), Marine Conservation Zone (MCZ), Special Areas of Conservation (SAC), Special Protection areas (SPA), Ramsar wetland or sites in the process of becoming SACs or SPAs ('candidate SACs', 'possible SACs', 'potential SPAs') or a Ramsar wetland. The plan area is unlikely to have a significant effect on a National Park, Area of Outstanding Natural Beauty or Heritage Coast, and is unlikely to impact upon the purposes for which these areas are designated or defined.

Guidance on the assessment of Neighbourhood Plans, in line with the Environmental Assessment of Plans and Programmes Regulations 2004 is contained within the [Planning Practice Guidance](#). This identifies three triggers that may require the production of an SEA:

- a neighbourhood plan allocates sites for development
- the neighbourhood area contains sensitive natural or heritage assets that may be affected by the proposals in the plan
- the neighbourhood plan may have significant environmental effects that have not already been considered and dealt with through a sustainability appraisal of the Local Plan.

Natural England does not hold information on the location of significant populations of protected species, so is unable to advise whether this plan is likely to affect protected species to such an extent as to require an SEA. Further information is included in Natural England's [standing advice](#) on protected species.

Furthermore, Natural England does not routinely maintain locally specific data on all environmental assets. The plan may have environmental impacts on priority species and/or habitats, local wildlife sites, soils and best and most versatile agricultural land, or on local landscape character that may be sufficient to warrant an SEA. Information on ancient woodland, ancient and veteran trees is set out in Natural England/Forestry Commission [standing advice](#).

We therefore recommend that advice is sought from your ecological, landscape and soils advisers, local record centre, recording society or wildlife body on the local soils, best and most versatile agricultural land, landscape, geodiversity and biodiversity receptors that may be affected by the plan before determining whether a SEA is necessary.

Natural England reserves the right to provide further advice on the environmental assessment of the plan. This includes any third party appeal against any screening decision you may make. If a SEA is required, Natural England must be consulted at the scoping and environmental report stages.

Please send any new consultations, or further information on this consultation to consultations@naturalengland.org.uk

Yours sincerely

Sally Wintle
Consultations Team

- - - - -

1 Habitats sites are those referred to in the [National Planning Policy Framework](#) (Annex 2 - glossary) as “any site which would be included within the definition at regulation 8 of the Conservation of Habitats and Species Regulations 2017 for the purpose of those regulations, including candidate Special Areas of Conservation, Sites of Community Importance, Special Areas of Conservation, Special Protection Areas and any relevant Marine Sites”.
